Professional Experience

Backend Developer (Real Project + Startup)

Getter • 2024 – 2025

- Independently developed and integrated 150+ RESTful APIs and more than 30 modules for production-level applications
- Studied and implemented microservice architecture, building several independent modules from scratch
- Designed and developed MVP-level backend solutions for multiple startup projects
- Collaborated with cross-functional teams to deliver high-quality backend infrastructure

Additional Projects & Experience

- Built the complete backend MVP for a startup project from the ground up
- Developed Telegram bots with complex business logic and integrated with various external services
- Gained hands-on experience with modern deployment workflows using Docker and GitHub Actions for CI/CD
- Worked with message queuing systems (RabbitMQ) for asynchronous task processing

Technical Skills

Backend Development

Node.js, JavaScript, TypeScript, NestJS, Express.js

Databases

PostgreSQL, MongoDB, TypeORM, Sequelize, Redis
