Uzbek — Native | Russian — Native | English — Intermediate

📁 PROJECTS

Recipe-app

Description:

Developed a multi-module mobile app (Client, Courier, Restaurant) using Flutter. Implemented real-time features with REST APIs, WebSockets, and Firebase Notifications. Applied MVVM and Clean Architecture principles. Handled authentication, secure storage, and navigation with Dio and GoRouter. Collaborated using GitHub for team workflow.

Store-app

Developed a multi-module fashion store mobile app (Client, Courier, Admin). Implemented product browsing, cart, and order management features. Used REST APIs, WebSockets, and Firebase Notifications for real-time updates. Applied MVVM and Clean Architecture principles. Handled authentication, secure storage, and navigation with Dio and GoRouter. Collaborated with the team using GitHub.

Airtravel

Developed a multi-module air travel mobile app (Client, Admin). Implemented flight browsing, schedule search, and ticket purchasing. Integrated real-time booking and payment tracking. Applied MVVM and Clean Architecture principles. Handled authentication, secure storage, and navigation with Dio and GoRouter. Collaborated with the team using GitHub.
